MAKE YOUR OWN (HIC!) TERRARIUM

Cecilia Mattison, hosiery part-timer, makes good use of empty wine bottles. She fashions them into terrariums which decorate any room of the house.

Cecilia first saw the idea in a display window and experimented on her own. Many bottles and plants were wasted at first but now she can carefully maneuver soil and the tiny plants through the small bottle opening to make an attractive display. In some bottles, she leaves the cork and still the plants survive.

"They seem to make their own oxygen in these pretty bottles," comments this talented terrarium maker.
